

## GROUND FLOOR

## FIRST FLOOR

## SENSORY FRIENDLY MAP

1. **The Study** – This room has a TV on the wall with music playing over a slideshow of photos. There is also a telephone on the desk that rings loudly – we ask that you leave it off the hook.
2. **The Character Room** – This room has audio at speaking volume when the cupboard doors are opened, as well as noise pollution from the adjacent space.
3. **The Yarning Circle** – This room has a TV on the wall with a video playing at speaking volume.
4. **The Vault** – This room is an old bank vault, so the room is narrow with an arched ceiling. There is narrated audio playing, and the hard surfaces make the sound echoey.
5. **The Theaterette** – This is a dimmed room. It has a TV on the wall playing looping footage with narrated audio at speaking volume.
6. **The Proud Marys Room** – This room has a monitor playing looping footage with narrated audio at speaking levels.
